Live Video

37%

Remote Patient Monitoring

39%

42%

38%

### Health Systems Are Just as Likely to Build Their Own Solution

PRO TIP

We expect to see more healthcare providers building their own solutions internally, or with help from system integrators, as embeddable video solutions become more accessible to developers.

PRO TIP

### Keys to Adoption

For areas within their control, respondents identified the following as key:

Security & Privacy

EHR integration

Infrastructure

Larger Facilities Tend to View Telehealth as:

HIPAA Compliant

Easy to Integrate

Easy to Use

And Are Over **2.5 Times More** Likely to Have Deployed Remote Patient Monitoring or Live Video

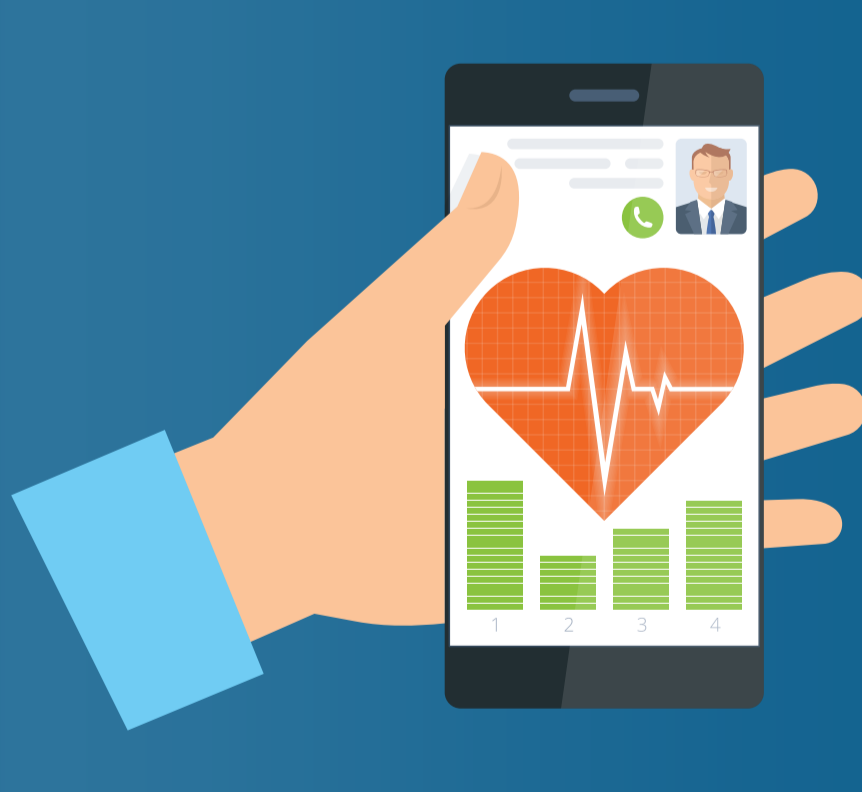

### Patient Outcomes Remain Primary IT Motivator

Improved patient outcomes: **35%**

Increased patient satisfaction: **31%**

Cost savings to the provider: **23%**

Cost savings to the patient: **12%**

## THE FUTURE IS NOW

The findings from this year's survey indicate that there will be continued and sustained growth for telehealth in the coming years and that achieving widespread adoption is within reach.
